Hi, I am backend developer. I work with laravel and mysql database. I study in the Department of Computer Science at the Faculty of Computers and Information at Mansoura University.. I designed and programmed some projects myself and achieved good sales under my supervision and management.

## EXPERIENCE

2020 – 2022

**FREELANCER**, FACEBOOK, 5AMSAT

I worked as a full stack web developer in many projects as a freelancer.

## EDUCATION

7 / 2022

**HIGH SCHOOL CERTIFICATE**, ELSADAT SECONDARY SCHOOL

I graduated from high school, scientific division of mathematics, with a grade of 84.6 in the new system of public high school

10 / 2022

**BEGINNING OF STUDIES AT THE FACULTY OF COMPUTING AND ARTIFICIAL INTELLIGENCE**, ELMANSOURA UNIVERSITY

## SKILLS

- html
- css
- sass
- bootstrap
- javascript
- jquery
- vuejs
- mysql
- sql
- php (mvc pattern, solid principles, oop)
- laravel
- c#

## PROJECTS

- **Smart Center System**

Software for private lessons that helps in management, absences, money, (online, paper) exams with autocorrect, parents contact, dealing with excel, and lessons with its groups.

I used permissions and roles in this project and barcode technology in absence mode.

I used php, laravel, mysql, bootstrap, css, html, javascript

- **Labels printing**

This project aims to eliminate the problem of writing on the packaging of a factory's products because it consumes a lot of time, effort and labor.

By printing pre-written labels stored in databases.

I used php native, mysql, bootstrap, sass, css, html

- **Website for private school**

I designed and programmed a landing page and dashboard for a private school. Addresses, phone numbers, a brief summary of the school's teachers, the top performers for each month, and a page for sending complaints and suggestions were displayed in it.

I used php native, html, css, javascript, jquery, bootstrap, mysql
